

Due to rapidly growing IP services, automation and popular use of IT applications in everyday business life the enterprise sector is investing into reliable and flexible telecom infrastructure. Iskra Sistemi has broad experience in voice, wireless and wire-line connections, disaster recovery, back up and data networks for corporate clients such as:

- Pharmacies
- Supermarkets
- Banks
- Financial institutions
- Insurance companies
- Production facilities
- Resorts and hotels

Many corporate customers, such as insurance houses and banks, are bound in Europe by strict rules to providing business continuity. Disaster recovery centers have become an unavoidable need in the business world. Iskra Sistemi ADM/SDR line of products is ideal for implementing backup links to DRC centers or to use microwave radio equipment to provide ad-hoc solutions in situations where a solution is needed in a matter of hours – such as recovery after an earthquake or a flood.
